SKILLS

Languages: Typescript, Python, C++, C#, SQL

Frameworks and Libraries: React, Tanstack Router, Next.js, Express.js, FastAPI, Langchain, Appium, Playwright

Technologies: Node, AWS, DynamoDB, App Runner, Docker, MongoDB, PostgreSQL, Supabase, Vercel, Github, Bitbucket, Jira, Unity, Godot

EXPERIENCE

Software Quality Assurance Engineer

March 2025 – Present

Emporia Energy

Littleton, CO

- Built an **AI driven** end-to-end test executor in **Typescript** by utilizing LLMs such as **Google Gemini** and **Moondream** for agentic and visual inference.
- Raised automated test coverage up to **~400** test cases within our app regression suite, and helped cut regression turnover time by **80%**.
- Closely collaborated with cloud and app teams in a fast-paced, event-driven environment to ensure seamless quality during high-frequency release cycles.
- Utilized open source **Model Context Protocol** projects to expand device interaction capabilities and more accurately simulate the user experience.

Coding Instructor

November 2024 – March 2025

iCode Bellevue

Bellevue, WA

- Teaching over 20 students foundational programming and software concepts through JavaScript, HTML, and CSS.

Software Engineer - Intern

July 2023 - September 2023

GoFundMe

San Diego, CA

- Worked with a senior engineer to implement a standardized event streaming protocol using **Apache Kafka**, to serve machine learning and business intelligence teams for downstream analytics.
- Developed a service named Eventer using **FastAPI**, which was used for publishing and subscribing to registered events within GoFundMe's main microservices, which included user and fundraising activity.
- Collaborated with microservice teams to implement event listeners in **PHP** and **Laravel**. Ensured proper integration and deployment with **PHPUnit**.

Software Developer - Intern

July 2022 - September 2022

VoLo Foundation

Remote

- Built a Flask app to centralize access to personal health data from various health wearables such as Dexcom Glucose Monitoring, Fitbit, and Oura Ring.

PROJECTS

TwoFrame.gg - A tournament management website for video games

Personal Project

- Formed a small team of developers to make a full-stack **Next.js** site for managing video game tournaments.
- Designed a data schema and developed a fully functioning backend using **Supabase**.
- Wrote a script to properly generate and display double-elimination brackets that take into account fair seeding and double-jeopardy avoidance.

Potlucky - A simple web app for planning potlucks

Personal Project

- Built a simple full-stack web app using **React**, **TanStack Router**, and **FastAPI** for organizing potlucks with friends.
- Utilized **Vercel**, **AWS DynamoDB**, **AWS App Runner**, and **AWS ECR** for app data and streamlined deployment.

EDUCATION

University of California – San Diego

2020 – 2024

Bachelor of Science, Computer Science
